

5210 : Gyroflam® Brazer for Standard Torch with Handle X 200

Description

Produces a flame that fully wraps around the pipe.
Ideal for quick brazing.

WARNING: Never attach this accessory to a Piezo handle, or you may destroy the flint.

TIP: Propane gas is to be different to butane because at 0°C:
- Butane produces no pressure.
- Propane provides a pressure of 4 bar without any difficulty.
