

## 2620 : Electric Test Pump

### The + product :

**Sturdy:** Structure and handle in lightweight ABS.

**Powerful:** 6 l/min – 40 bar.

**Autonomous:** Can suck fluid from a tank.

### Description

For leak testing on water installations (plumbing, individual central heating...).

**Fast and effective work.**

Accurate results with **its glycerine manometer with 1 bar grading.**

Easy to carry thanks to its compact design and carry handle.

Shock and corrosion resistant.

**Self-extracting up to 1 m** if no water intake available.

Fluids accepted: water, Glycol (requires rinsing after use).
