

## 2620: Electric Test Pump

## The + product:

Sturdy: Structure and handle in lightweight ABS.

Powerful: 6 l/min - 40 bar.

Autonomous: Can suck fluid from a tank.

## **Description**

For leak testing on water installations (plumbing, individual central heating...). Fast and effective work.

Accurate results with its glycerine manometer with 1 bar grading.

Easy to carry thanks to its compact design and carry handle.

Shock and corrosion resistant.

**Self-extracting up to 1 m** if no water intake available.

Fluids accepted: water, Glycol (requires rinsing after use).
