

2950 : Virafal® High Flow Sludge Removal Pump / Descaling Pump

The + product :

1 standard version, 1 connected version in compliance with European Directive EN 806.

Mechanical cleaning 2 in 1:

Air/Water pulses to separate the sludge.
Air/Water continuous flows to expel the sludge.

Chemical cleaning 4 in 1:

Sludge removal from radiators.
Sludge removal and sanitization of heating floors.
Protection against scale and corrosion.
Disinfection of drinking water pipes.

Description

Easy installation with its roller trolley and fastening suction cups. Connectors and pipes supplied for immediate use.

High performance action: Maximum flow rate 80L/min and maximum pressure 8 bar.

Effective and robust compressor: Self-lubricated, power 1.5 kW and evacuates 200L/min. Maximum temperature of use: 30°C.

For easy transport of your Virafal® or Virafal® Connect, models 295053 and 295059 are delivered with an extra raised handle. Tool-free assembly, quick height adjustment. Handle also available alone (ref. 753778).

Additional features of the VIRAFAL® Connect:

Connects with a SmartPhone/tablet under Android, iOS or a PC via a Bluetooth connection to print an intervention report in compliance with European Directive EN 806 on drinking water piping. Intervention report written and transferred using the Virafal application available on Android, iOS and PC

The use of Virax additives (sold separately) requires using the fitting ref. 295052 and injector ref. 295051. These additives allow chemical use for all types of installations. They can be rejected to the sewers without detrimental effect on the environment.

More Information

Supplied with	Two 1.5 m long transparent pipes (3/4")
