

0106 : Chain Wrench with reversible jaws

The + product :

Lasts twice as long: reversible jaws.

Low wear : forged and treated jaws.

Less effort : adapted handle length.

Description

Very heavy-duty chain wrench for the energetic tightening of water pipes and pipelines with difficult access ((water and gas pipes in trenches ,) in the chemical and oil industries, shipyards, ...

Practical use similar to a ratchet with a back-and-forth movement.

Economical and never out of grip on the pipe, just turn the jaws over if the first side is worn.

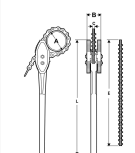

Repeated, powerful and slip-free tightening thanks to its forged and low-wear jaws.

Low effort with long forged handle for optimized force multiplication and high torque.

High strength hardened steel chain.

Quick opening for easy placement on the pipe even in tight spaces.

6 sizes from 1.1/2" to 12".
