

## 0150 : Wrench to knurling

### The + product :

**Efficient and fast:** pronounced and regular knurling in just a few steps

**Maintaining the clamping position:** Adjustment ring for an opening adapted to the size of the tube

**Long lifespan:** hardened steel rollers

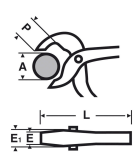

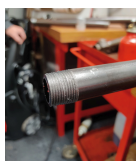

### Description

Knurling tool for tubes and threaded fittings up to **2''** for **better grip of the fiber.**

The knurling creates grooves making it easier to place the fiber and hold it in place when tightening, thus **reducing the risk of leaks.**

Maintaining aperture thanks to the **adjustment ring.**

Interchangeable hardened steel rollers for long life.
